

**3rd International Symposium on Sustainable Ironmaking
29 – 30 July 2010**

**Centre for Sustainable Materials Research & Technology (SMaRT@UNSW)
UNSW, Sydney, Australia
Venue: Conference & Residential Centre UNSW, Sydney**

We are organising an International Symposium on Ironmaking in which people from coal, steel industry and academic institution will participate. The Symposium will bring together participants from both industry and academia to address some of the ironmaking challenges. This Symposium aims to update current state of ironmaking technologies and identify future pathways for reducing GHG impact of ironmaking processes and raw materials for sustainable development.

Speakers from the following organisations have committed to attend and deliver presentations: ACALET, BlueScope Steel, CSIRO, Gujarat NRE Coke, Hatch, Introspect Consulting, Kobe Steel, MEFOS, Nippon Steel, OneSteel, Sabic, Sino-Steel Anshan Research Institute of Thermo-Energy and the following universities have committed to deliver presentations: Hokkaido Univ, Uni of Tokyo, Tohoku Uni, Kyushu Uni, Kyoto Uni and UNSW.

Some of the Symposium details are:

Co-chair – Scientia Prof. Veena Sahajwalla
Centre for Sustainable Materials Research & Technology (SMaRT@UNSW)
University of New South Wales, Sydney, Australia

Co-Chair - Prof. Masanori Iwase
Ferrous Metallurgy Research Group
Department of Energy Science & Technology, Kyoto University, Kyoto, Japan

To attend the Symposium, please complete the registration form and send to:
