would help breed horns out of beef cattle; a wave energy converter; a computer program that allows students to conduct laboratory experiments on the internet; and do-it-yourself hearing aids.

Professor Sahajwalla won the $5000 prize in the Manufacturing and Hi-tech Design category of the competition as well as the overall $25,000 prize.

She is Associate Dean (Strategic Industry Relations) of the UNSW Faculty of Science and is one of Australia’s best known engineers and scientists, having been a judge on the ABC TV program *The New Inventors*.

She has received many awards including the 2011 National Nokia Business Innovation Award at the Telstra Business Women’s Awards and the Banksia Environmental Foundation’s 2012 GE Eco Innovation Award for Individual Excellence.

In May she was appointed as a commissioner on the Australian Government’s Climate Commission.
